-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on RCE filed on 6/30/05.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

1. This Office action is responsive to request for continued examination filed on 6/30/05.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-3 and 5-9 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-10 of U.S. Patent No. 6,680,792 in view of Pub. No. US 2002/0186209 (Cok).

Present application 09/875,401 (Miles), claim 1	Patent No. US 6,680,792 (Miles), claim 1
A touch screen display comprising a touch screen	A modulator of light
A pressure tolerant display including a plurality of interferometric modulator element	A plurality of modulation elements
The touch screen is directly coupled to the display	

A substrate having a first and second surface	A substrate
At least one metallic membrane forming an interferometric cavity with the film stack, wherein the distance between the metallic membrane and the film stack determines the color produced by each of the interferometric modulator elements	A plurality of modulation elements formed on the substrate each modulation element defining an interference cavity for causing interference modulation of the light to produce a color condition

Claim 1 of U.S. Patent No. 6,680,792 differs from claim 1 of the present invention in that it does not specifically disclose a touch screen is directly coupled to the display. However, Cok teaches a touch screen (10) is directly coupled to the display (49) [0029]-[0031]. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate the touch screen as taught by Cok in the system of 6,680,792 (Miles) in order to provide a thin, light weight device and enables a user to operate a device simply by touching various locations on the touch screen.

4. Applicant's arguments with respect to claims 1-3 and 5-9 have been considered but are moot in view of the new ground(s) of rejection.
